EDUCATION

Illinois Institute of Technology — Aug. 2024 – May 2026
Bachelor of Arts in Computer Science

Harper College — Aug. 2022 – May 2024
Associate's in Computer Science

EXPERIENCE

Content Creator/Designer — October 2022 – Present
Self Employed
- Grew social media to 2M+ followers with data-driven strategies, daily content, and merchandise design; produced visual content for clients using CapCut and Adobe Creative Suite

Marketing Assistant & YZY App Developer — December 2023 – May 2024
Yeezy
- Promoted Yeezy merchandise by identifying influencers and creating digital marketing content; helped develop and market the YZY app, integrating music streaming and e-commerce for Kanye West's 2024 launch

Web Developer Intern — January 2023 – August 2023
Azlan Technologies
- Built responsive websites with HTML, CSS, JavaScript, and React; enhanced performance and usability, increasing user engagement

Full-Stack Developer Intern — January 2024 – August 2024
Azerty Ltd
- Developed interactive web apps with React and Node.js, focusing on UI/UX and e-commerce; integrated CMS and optimized listings to boost sales and engagement

PROJECTS

NBA Game Predictor — 2024
Machine Learning Project
- Built an NBA game outcome predictor using historical stats and scikit-learn; used Pandas for data preprocessing and deployed via Flask API for real-time predictions

Instant Resume Builder — 2024
Web Application
- Developed a LaTeX resume generator web app with Overleaf CLSI API and Node.js interface; Dockerized the CLSI service and enabled PDF export with customizable templates

TikTok Feedback Bot — 2024
Automation Script
- Created a Python bot to auto-submit feedback to TikTok hourly using Selenium, rotating user agents, and headless Chrome; implemented logging, error handling, and scheduling
